Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

Claims 1- 53 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5579944 see cols 1-4, claim 1.

The reference multi-layer gasket for providing a seal between a mounting cup and a container comprising a middle layer of rigid plastic material and inner and outer layers of softer plastic material. The middle layer supports the inner and outer layers, which provide sealing surfaces with the mounting cup and the container bead. A gasketed mounting cup comprising a panel, a skirt integral with and depending from the periphery of the panel, wherein the skirt is outwardly flared to form an annular channel for receiving a container bead that defines the container opening and a multi-layer gasket positioned in the channel portion of the mounting cup, which gasket comprises a middle layer of rigid plastic material, an inner layer of soft plastic material adjacent the channel of the mounting cup and an outer layer of soft plastic material for engaging the container bead. The middle layer is preferably high density polyethylene or polypropylene and the inner and outer layers are preferably linear low density polyethylene. A layer of thermally activated adhesive can be placed adjacent the inner layer.

Art Unit: 1711

Claim 4 of the reference discloses a multi-layer gasket of claim 1, wherein said intermediate layer is chosen from the group consisting of polyethylene, acrylonitrilebutadienestyrene, acetal, polyamide, *polycarbonate*, polypropylene or *polyester*.

Claim 6 of the reference discloses a multi-layer gasket of claims 1, 4 or 5, wherein said second layer is chosen from the group consisting of polyethylene, elastomers, *polyurethane*, ethylvinylacetate (EVA) copolymer, ethylene-ethyl acrylate copolymer, polyethylene-butyl compounds, polyisobutylene or polyester elastomers.

Thus, the references discloses a molded article wherein one inner layer or substrate layer comprises a polycarbonate and a polyester and an outer layer which may be a polyurethane. In view of the above, there appears to be no significant difference between the reference and that which is claimed by applicant(s). Any differences not specifically mentioned appear to be conventional. Consequently, the claimed invention cannot be deemed as novel and accordingly is unpatentable.
